ICME 2007 Tutorial Proposal Invitation

During July 2-5, 2007, ICME will be held in the exciting city of Beijing, China, where the Great Wall and the Forbidden City are located, and where many priceless Chinese historical treasures are displayed. One year before Olympics 2008, the Beijing ICME promises to be a worthwhile conference for academia and industry to meet and advance the latest development in multimedia technologies and applications.

Tutorials held at the beginning of every ICME are designed to educate industrial practitioners and academia on the latest exciting multimedia technology trends as well as the relevant theories. We are now calling for proposals of such exciting tutorials. Topics of interest for the tutorials include, but are not limited to,

- Audio, speech, image, video processing
- Virtual reality and 3-D imaging
- Signal processing for media integration
- Multimedia Communications and networking
- Multimedia security and content protection
- Multimedia human-machine interface and interaction
- Multimedia databases
- Multimedia computing systems and appliances
- Hardware and software for multimedia systems
- Multimedia standards and related issues
- Multimedia applications

Brief proposals should be submitted to Prof. Oscar C. Au at eeau@ust.hk and Prof. Ming Ting Sun at sun@ee.washington.edu, and must include title, abstract, description of the tutorial, duration (3 or 6 hours), contact information, short biography of the proposer/presenter and a list of publications related to the proposal.

Deadline for tutorial proposal is Dec 1, 2006.
